## NEW WALKED UP GROUND IN NORTH WALES 4000 ACRES

We took over the main pheasant shoot after having had scraps of ground for many years I'm hoping in season we will see many of you during the season plenty of mixed game here.

## Management Stalking Form and current results

We are going to introduce a management form to be completed by stalk members to better monitor deer shot, sex, age, species and condition. On our Dorset blocks Jim Primrose Lymburgh farm would like you currently to just leave a note of how you did that day and put it through his letter box. Any comments welcomed. Note as an example most deer in Dorset are walk through's and not territorial. So pressure not an issue after 20 years I should Know But opinions welcomed. We have seen many deer taken over the full range of areas and a general mix of species.
